MessengerLog 8

[Download](#)

Monitor conversations online for any of the popular instant messaging programs available on the Internet. If you want to keep track of the conversations in real-time, regardless of the software you are using, this tool is the right choice for you. With MessengerLog 8 Cracked Version you can search through your log files, quickly and easily, to identify chats you want to save. If you want to search the archive, all you have to do is select the search criteria and click the Search button. MessengerLog 8 will search through your log files, matching the criteria you entered, and display the corresponding chats.

MessengerLog 8 Highlights:

- Real-time logging of your online conversations for any instant messaging program.
- Save any chat history to the hard drive (or upload them via FTP) and archive the chats (either to a FTP server or email yourself).
- Search for any chat (or group of chats) in your log files to save time and effort.
- Filter conversations (or groups of conversations) using criteria you define.
- Compress chat logs for protection.
- Password protection for your log files, plus password encryption.
- Automatic log file backup to the hard drive.
- Send logs via email.
- File export in HTML, TXT, or RTF.
- HTML to auto-fill Web sites with Chat history data.
- "All contacts" and "Exclude from search" features.
- Works with all the most popular instant messaging programs.
- No Spyware or Adware.
- Free to try.
- Free updates for life.

MessengerLog 7 is an instant messenger application designed to help you keep track of your online chat history, saving you time and effort in finding all the conversations that need to be archived. View your instant messaging chats in a single window, even if the instant messenger application is not running.

MessengerLog 7 Description: MessengerLog 7 is an instant messenger application designed to help you keep track of your online chat history, saving you time and effort in finding all the conversations that need to be archived. You can always view the chat history in the Instant Messenger window (or select from among various other ways), even if the instant messenger application is not running. This makes MessengerLog 7 very useful, as it makes archiving conversations quick and easy.

MessengerLog 7 Highlights:

- View the chat history in the instant messenger window, even if the instant messenger is not running.
- The

Work with virtual keyboards Multi-platform Change the look of virtual keyboards KEYMACRO is a utility to create a virtual keyboard. You can easily create a virtual keyboard with many characters and change its look. The virtual keyboard can be placed anywhere on your desktop, as well as in any window. The virtual keyboard can be used when you are using a different keyboard layout than your standard one, as you don't need to change the standard keyboard layout while typing, just the virtual keyboard. Keyboard configurations KeyMACRO uses the Multi-Character Key Combination data, which allows the creation of a keyboard with any number of characters. The configuration of each character is represented by a character on the keyboard. To enter the configuration of a character, you need to press a key on the keyboard. KeyMACRO has a built-in library of characters, which allow you

---

to create virtual keyboards with many characters and symbols. You can change the layout of the library of characters to have a look that you like. Different keyboard layouts KeyMACRO can use the following keyboard layout: QWERTY Dvorak Colemak Standard Dvorak and Colemak keyboard layouts are included in the installation. If you want to create a keyboard layout, it is enough to add new files. KeyMACRO can automatically detect the default keyboard layout and change the key layout to the appropriate one. Settings KeyMACRO allows you to configure a number of its settings in the Configuration Panel. You can choose from the following options: Copy keys to clipboard Deselect duplicate characters Include the key shortcuts Set the key shortcuts Set the size of the keys Create the keyboard layout If you press the Create Layout button, you can enter the name of the keyboard layout. If you press the name, the current layout will be replaced by the new one. You can change the layout name that you created. KeyMACRO supports 16-bit and 24-bit color. You can choose between these two options. Tools KeyMACRO has a number of tools that will be useful for creating virtual keyboards. KeyMACRO has a tool to convert the images of a character into a palette. You can choose the color and intensity of the palette. KeyMACRO has a tool to create a keyboard from the palette. You can create a character and choose the palette for the character. KeyMACRO has a tool to create the character set with the given number 80eaf3aba8

\* Supports various instant messaging systems, including Google Talk, MSN and Yahoo! Messenger \* Extracts chat history from these applications and logs them into the system. \* Uses a convenient, user-friendly interface \* Opens the logs automatically when you launch the program \* Automatically uploads the logs to a FTP server \* Password protect logs and hide log directories \* Supports filtering, so that you can watch all your instant messaging activities, or only the ones you want \* Supports various other utilities, so MessengerLog 8 is an invaluable tool for use in parental control or in support of companies

popular Instant Messengers Although iChat is one of the most popular instant messengers, Apple is working hard to keep it as one. However, the latest iChat (8.0) is already Mac OS X compatible and that means it has a new user interface. In fact, Apple is not the only one working on improving iChat. The news are also the latest official versions of Skype, AIM, Google Talk, Yahoo! Messenger, Windows Live Messenger and MSN Messenger. And if there is any one program that is still missing in this list is the XMPP instant messenger Jabber. However, the developers are working hard to make sure the next version of iChat will be ready. The full Windows version of the application is now available. Install MessengerLog 8 on your PC and enjoy all the benefits of being able to monitor your instant messenger conversations. Features: - Monitor all your instant messenger conversations - Support for all major instant messenger programs - Open URLs in your default web browser - Store your messages and archives in a secure and private chat archive - Keep a log of your chats - Support for FTP server - Send chat logs via email - Send chat logs via HTTP - Export logs in HTML, TXT or RTF format - Encrypt and compress logs for extra security - Exclude any contact from logging Watchdog for instant messengers Another very important thing in life is to keep track of what is going on in the world. Many parents want to make sure that their children are safe and free of any trouble, so they prefer keeping an eye on them at all times. That means that you should always keep track of any conversation that your children have with anyone. With MessengerLog 8 you can now do this with your own eyes because the software is a great solution to keep track of your kids' chats on the internet.
